## Land Use Planning: Routine Inclusion of Bicycling and Walking in New Developments

Wednesday, February 15, 2012 from 2:00p.m. to 3:30p.m.

**Webinar location: MoDOT Traffic Management Center—Room 209**  
14301 South Outer 40 Road  
Chesterfield, MO 63017

This web seminar is sponsored locally by:

**Description:** Broad land use patterns and transportation policies determine whether walking and bicycling are not just possible, but practical and enjoyable. Understanding how the big picture works is essential for those engaged in regulating, designing and advocating for more sustainable transportation options. Attend this webinar to learn how land use policy and regulations are the basis for pedestrian and bicycle friendly communities, and what to look for in plan review. Through overview and examples of policy and regulations, and the experience of one small Wisconsin city (Fitchburg, pop. 20,000), you'll find out how innovative zoning codes and policies can help promote active transportation.

People attending this webinar will learn about:

- The connection between transportation and land use, and how it relates to Smart Growth
- The importance of connectivity and the benefits of street networks
- Smart Code/Form-based Code, including the Bicycle Module, as well as the urban-rural continuum of development contexts
- Land use policy vs. regulations, including what can be regulated through zoning and subdivision standards
- Examples of site designs and best practices for integrating design standards into land use regulations
- The land use, development regulations, and bike/ped transportation elements of the Fitchburg, Wisconsin Comprehensive Plan.

Presenters are John Cock, Alta Planning + Design; Mike Lydon, The Street Plans Collaborative; and Ahna Bizjak and Susan Sloper, City of Fitchburg.

Note: APBP has applied for one CM credit from the AICP for this webinar. A certificate of attendance for those wanting to claim Professional Development Hours will be available.

**RSVP by 5:00 p.m., February 14, 2012 to:**

Glenna Nesbit at Great Rivers Greenway: [gnesbit@grgstl.org](mailto:gnesbit@grgstl.org)

Attendees who RSVP will receive the handouts via email before the webinar.
